

Survey 123: GIS friendly, Integrated, **Mobile Data Collection solution at the ICRC**

Integrated mobile data collection solution at the ICRC, integrated within ICT infrastructure and directly connected to the GIS server (Geoportal and other related applications)

Ask and Collect
Store on ICRC Servers
View/analyse/decide
Easy for reports and maps!

Survey 123 will fit probably to 90% of your needs according to your objectives:

- Data you would like to collect
- Data flow
- And your survey constraints.

Gather data for an efficient work.

Prepare your survey with tabular data or paperform

Join a GIS officer via GISupport@icrc.org in order to encode your form for your mobile device. (S)He will provide a quick training on how to collect the data, synchronize and analyse your data as well.

Get your login and access for your secured data within ICRC ICT infrastructure

Multi platform (IOS, Android, Windows). Load the forms in your smartphone, launch your campaign (one account per project)

What should I know more about ?

Collect locations (points, networks, areas) based on a map form or update this data with CollectorApp.

For simple survey for 10 collectors:
1 day is needed to setup the framework (encoding the App, building the webform, providing access...)

Do not forget your Accupack (battery) for your long survey !

Detailed maps as baseline for your survey on same CollectorApp
